Re: WXXY(AM), Dover, DE
Facility Identification Number: 21632
WXXY Broadcasting, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed June 3 and July 29, 2008, on behalf of WXXY Broadcasting, Inc. ("WBI"). WBI requests further extension of the special temporary authorization (STA) originally granted on September 18, 1998, to former licensee Vin-Lor Broadcasting, Inc., for operation of Station WXXY (formerly WRJE) with power reduced to 25 per cent of licensed power, employing a nondirectional antenna.¹ In support of the request, WBI states that WXXY lost its rights to most of its licensed site, which resulted in the takedown of two towers. WBI states that, it continues to prosecute its application for construction permit to relocate the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Application BP-20040504AAS remains pending; thus, WBI has been prevented from restoring licensed operation due to causes beyond its control and that it has taken appropriate steps to expeditiously resolve the problem; thus, extension of STA is warranted.

¹ WXXY is licensed for operation on 1600 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns day and night (DA-2-U). Application BP-20040504AAS proposes a reduction in daytime power to 4 kilowatts and nighttime power to 0.11 kilowatt, and changes to the daytime and nighttime directional antenna patterns.

Accordingly, extension of STA IS HEREBY GRANTED. Station WXXY may continue to operate at its licensed site with reduced power not to exceed 1.25 kilowatts daytime and 0.25 kilowatt nighttime, nondirectional. It will be necessary to further reduce power or cease operation if complaints of interference are received. WBI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 9, 1009**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.
